Detection (active substance etc.)	Result value (mg/kg)	Maximum (residue) level (mg/kg)	Exceedance of the maximum (residue) level? (Mark with a cross if applicable)	Not authorized active sub- stances? (Mark with a cross if applicable)
			<input type="checkbox"/>	<input type="checkbox"/>
			<input type="checkbox"/>	<input type="checkbox"/>

Crop: _____

Variety: _____

Method of cultivation (field/greenhouse): _____

Affected field/greenhouse: _____

Complaint from QS on: _____

Consultancy requested on: _____

Consultancy done on: _____

Qualitätssicherung. Vom Landwirt bis zur Ladentheke.

(possible) cause(s) of the complaint	Measure(s) / prevention strategy(s) in relation to the complaint

Qualitätssicherung. **Vom Landwirt bis zur Ladentheke.**

General notes

- Possible measures to avoid foreign entries e.g:
 - Coordination of plant protection use with neighbors
 - Use of drift reducing nozzles
 - Creation of border strips

- The analysis of pre-harvest samples is a good way of complying maximum (residue) levels in the product ready for harvest.

Participant(s) (*name, first name; signature*):

Consultant (*name, first name; company/organization; signature*):

Within Germany, the consultancy was provided by the official plant protection service or consultancy service, or an organisation/person approved in Germany according to §10 of the Plant Protection Act. Outside Germany, a similarly qualified consultancy service was used in the same way.
