Explanation: Documents to be submitted

In addition to the completely filled registration form for laboratories the following documents have to be submitted for the approval procedure:

- Accreditation certificate, including annex in German or English. If the method is still under development, evidence has to be submitted that the accreditation can be expected within the next 12 months.
- Validation documents (for all applied methods), e. g. linearity, recovery, robustness
- Verification documents (current procedures for performance review during the routine analysis for all applied documents)
- Laboratory suitability tests:
 - For each applied parameter/method, the participation in ring tests has to be submitted. The results have to be presented to QS in the form of the original report including cover sheet and laboratory code.
 - Overview of all submitted laboratory suitability tests
- Complete analysis spectrum of all parameters (including quantification limits)
- Copy of an exemplary analysis report.
- Documentation of subcontracting (if necessary).
